EDUCATION

Illinois Institute of Technology

Chicago, IL

Bachelor of Science in Artificial Intelligence, Minor in Cyber Defense

Aug. 2023 – May 2027

- GPA: 3.875
- Relevant coursework: Artificial Intelligence Language Understanding, Introduction to Artificial Intelligence, Introduction to data networks and the internet, Database Organizations, Intermediate Software Development, Intro to Deep Learning, Software Engineering

EXPERIENCE

Teaching Assistant

Jan. 2026 – May 2026

Illinois Institute of Technology

Chicago, IL

- Led weekly lab sessions focused on advanced Java and object-oriented programming concepts, including inheritance, polymorphism, and abstraction.
- Held office hours providing one-on-one debugging support and guidance on program design and code.
- Assisted with grading programming assignments and reinforcing best practices in clean and maintainable code.

PROJECTS

BiteBoxd | *Python, FastAPI, PostgreSQL, SQL, HTML, CSS, JavaScript*

Dec 2025 – Feb 2026

- Designed a data-centric recipe platform enabling structured collection of user ratings, reviews, and interaction metadata.
- Built backend pipelines using FastAPI and PostgreSQL to support scalable data storage and retrieval for downstream analytics.
- Modeled relational datasets suitable for future recommendation systems, ranking algorithms, and user-preference analysis.

Chicago 'L' Intelligent Transit Assistant | *Python, Streamlit, Claude API, CTA API*

Jan. 2026 – May 2026

- Built a multihead self-attention transformer model (4 heads, 4 feature tokens) to predict CTA L train delays; achieved validation MAE of 0.47 min using ridership, weather, and live sports data
- Fine-tuned Meta-Llama-3.1-8B via QLoRA on 1,291 synthetic examples; replaced GPU runtime with Claude API for Streamlit Cloud deployment
- Deployed full-stack app with live CTA station map, attention weight visualizations, and LLM-generated delay explanations

Sentiment Analysis Classifier | *Python, NumPy, Pandas*

March 2026 – April 2026

- Implemented Naïve Bayes and kNN text classifiers from scratch (no ML libraries) to classify 525,814 Amazon reviews, achieving 91.6% accuracy and AUC of 0.91 with Naïve Bayes
- Applied Laplace smoothing, log-space inference, and a matrix multiplication trick for vectorized kNN distance computation across a 23K-dimensional vocabulary
- Analyzed impact of class imbalance (84% positive skew) on classifier behavior; balanced dataset improved Naïve Bayes specificity from 72.4% to 86.9%

SKILLS

Languages: Java, Python, SQL (PostgreSQL, SQL Server), JavaScript, Haskell, HTML, CSS

Tools & Frameworks: GitHub, React, Node.js, Flask, FastAPI, Bootstrap, JUnit, ROS, Streamlit

AI / Data: LangChain, OpenAI API, Claude API, PyTorch, HuggingFace (PEFT/transformers), NumPy, Pandas, scikit-learn, ChromaDB, sentence-transformers

Soft Skills: Debugging, Mentorship, Communication, Problem Solving, Collaboration, Agile Development, Organization

HONORS, ACHIEVEMENTS & ACTIVITIES

- Dean's List at Illinois Tech, multiple semesters (Dec 2023, May 2024, Dec 2024, May 2025, Dec 2025, June 2026)
- President, Association for Computing Machinery (ACM) Illinois Tech Chapter (Jun. 2026 – Present)
- Member and Treasurer of the Illinois Tech chapter of Upsilon Pi Epsilon (UPE) Honor Society (May 2024)
- Vice-President Of Publicity, Illinois Tech Robotics (ITR) (Dec 2025 – May 2026)
